Stand Alone Application Development:

The cost of an Application cannot be determined with its functionalities and appearances and we believe that Ocsid provides the economical and the best application its arena.

Our Variety of Products will give you a clear idea of Ocsid Portfolio:

1) School Management System

It's a complete solution for small and medium scale schools to manage whole school data in a single system which is easy to use and user friendly which is built based on the education system in Karnataka and must buy product for all the schools to make administration easy

2) Retail Management System

RMS(Retail Management System) the name itself suggest what the application is all about and the application has complete feature which a small and medium scale shops and showrooms need to print their invoice and track all the invoices, No extra knowledge is required to use the software just a basic knowledge of operating a computer is enough to use the software

3) Bulk E-mail Sending software

A web based application used to send mails to groups or group of contacts. It can be used to advertise your company or send newsletters, articles and updates to your customers or clients, inbuilt HTML Editor and Attachment insertion as an added advantage; it is complete user friendly software which can also be used for marketing purpose. This can also be used without hosting which is a special feature

4) **Bulk SMS Sending Software**

Send thousands of SMS to any telephone number across India through this software just by connecting a modem or a mobile phone to it. Application comes with loaded features like contacts and groups creation and send to groups, black list, flash message and a special option which resumes automatically after 100 messages and allows you to change the sim card or modem if required, it is complete user friendly software which can also be used for marketing purpose.

5) **Library Management System**

The complete solution to manage any library from school libraries to district large public Libraries which has all the feature like Add/ Edit/ Delete books, Register user and Members, Track books. It is not a software application but an Embedded App with RFID and Barcode Embedded to it which makes the task easier and reduces almost 70% work load of a librarian.

Embedded Systems

1) **Home Security Systems**

'Abhay' is a home security system which keeps your house safe from thieves and other intrusions and also protects you from accidental hazards like gas burst, earth quake etc and it is must have security system for any house irrespective your residing location either it is a busy city or a remote place , your safety is first, prevention is better than cure and we are up to prevent your house from danger
